SCS Certified

Avonite was the first to produce Recycled solid surface products, starting in 1996, and the first to achieve certification by Scientific Certification Systems (SCS). SCS Certification is the gold standard for environmental content and practices.

SCS conducted a rigorous evaluation of **Avonite Surfaces** that included a comprehensive audit of the company's claims, including site-visits to manufacturing facilities to examine the process and interview plant personnel.

This recognition by SCS assures building and design professionals using **Avonite Surfaces** Recycled Product of the recycled content in order to achieve LEED certification and meet other green building guidelines, an increasingly critical measurement used in sustainable building.

Custom Size Sheet Program
Case Study Example

The Custom Sheet Size program is a cornerstone to our approach to Resource Responsibility. By precisely determining the dimensions of our product, waste is prevented and energy use is reduced.

A military housing project required 500 showers. Foundations produced custom sized ¼" sheets of 60" x 78" and 60" x 30" to provide a ready to install shower wall system. If standard size sheets of 30" x 98" x ¼" had been used, it would create 24 SF of waste per shower. The scrap waste on this scale would have been 12,583 SF. That is over 13 tons that otherwise goes to landfill. At an average of $8.50 SF that equals about $107,000 wasted scrap. The labor savings of having no seams is estimated at over $50,000.

STUDIO COLLECTION™

Since the company's inception, the Studio Collection from **Avonite** has given leading designers a dazzling edge to their projects. Innovation and creativity literally jump off the surface wherever you specify these products.

The new Petals series bring a rich texture and depth to solid surface. The Glass Series have been the star of many top designs, with backlit counters and stunning vertical walls in hospitals, universities, restaurants, and hotels. Traditions, Metallics, and Crystelles all bring an impactful pop to any design. These products are available in ½" thickness.

The Studio Collection is Made in the USA Zip Code 87002.

Printed color may vary from the actual product. View the product under actual lighting conditions for best results.

- ● These dark colors will show wear in counters, requiring more maintenance to maintain finish.
- ◆ Use polish finish for best aesthetic result.
- ▲ This product has a light reflective property that shows direction (lighter or darker depending on the angle).

Avonite's seven vibrant Recycled products in the Studio Collection are produced with reclaimed materials that were destined for landfills.

In 2005, **Avonite Surfaces®** Recycled Collection products achieved SCS Certification, verifying that these products contain a minimum of 40% recycled content. This third-party certification provides confidence to use these products as key components of any sustainable design.

FOUNDATIONS™

Foundations™ acrylic products are the essence of fit for purpose design. Laminate and tile are no match for the lower cost of ownership and ease of maintenance of Foundations™ products in applications including countertops, backsplashes, bathroom vanities, and shower stalls. The wide sheet and custom size features of the Foundations products deliver significant cost savings for large projects. These products are available in ½" and ¼" thicknesses.

The Foundations products are Made in the USA Zip Code 41042.
